For Immediate Release

Accel Inc. Joins the SafetyCare Authorized Dealer Program

WHITE MARSH, VA – Oct. 5, 2007 – SafetyCare™, which offers a full range of security and safety programs and services to communities across the country, today announced that Accel Inc. of White Marsh, VA, has joined its national Authorized Partner Program.

In what officials from both companies describe as a perfect match, Accel (www.getaccel.com) will offer SafetyCare's security monitoring and emergency response communication services to its customers.

SafetyCare is a new generation in security, demonstrating how traditional security systems, by themselves, are obsolete. Unlike the traditional security companies, SafetyCare provides clients with immediate access to certified Emergency Medical Technicians (EMT) and offers wireless security products, among many other unique services.

SafetyCare customers access the 24-hour-a-day system by simply pressing a button or calling from anywhere in the world. They gain voice contact with a certified Life & Safety EMT at the SafetyCare Response Center, based in Reading, Pa. The highly-trained response team – all-certified EMTs – has years of experience working with people in need.

Accel is a security alarm company based in the Yorktown area of Virginia. The company, which was founded in 1998, offers security and fire alarm systems, cameras, web cameras and medical alert pendants to its customers. Accel specializes in 24-hour video monitoring for all types of properties, including small private homes, large apartment complexes, commercial properties and construction sites.

SafetyCare General Manager Michael Bodnar said SafetyCare is proud to partner with such an innovative security monitoring company.

“Our Authorized Partner program is designed to provide select professionals with opportunities to distribute SafetyCare's one-of-a-kind services to their customers,”

Bodnar said. “Such an arrangement with Accel will now make it possible for residents in Virginia to reap the benefits of superior and unique home security services.”

By simply touching a button, Accel customers can now connect to SafetyCare’s emergency response headquarters, staffed entirely by Certified Emergency Medical Technicians, 24 hours a day.

“The SafetyCare product has a very long range, it’s dependable and there’s an EMT on the other end of the phone when you need one,” said Accel President Ralph Sanders. “This is going to help us expand our services into the residential market, as we’ve previously focused on commercial properties.”

To learn how to become a SafetyCare Authorized Partner, call 800-483-0888 or visit www.safetycare.net.
